Press Release  
Oct 26th, 2016

## Availpro increases Slovakian market penetration alongside with a new partner Asseco Solutions

**Bratislava, Slovakia, 5th October 2016** - Making changes in hotels operations to save a massive amount of time and money is the challenge of this beginning of the autumn term.

[Availpro](#) – leading hotel distribution suite for approximately 7,000 properties all over Europe – is proud to announce today the 2-way integration to Horec, Property Management System (PMS) by Asseco Solutions.

**Jules Prothais**, Global PMS Partners Manager at Availpro commented *“It is a win-win move with our partner Asseco Solutions for an easier and seamless management of internet bookings for the hotels. We are delighted to be associated with Asseco Solutions, a most advanced hotel management solution.”*

**Edita Angyalová**, COO Slovakia and Member of International Board, quoted *“Availpro is a leading provider of e-software in Europe. We are glad to have a common goal with our partner Availpro – maximise the hotelier’s work comfort and over meet his demand on our software products”.*

Working with both Availpro and Asseco Solutions give the hotels the expertise of two integrated solutions well established in the Eastern Europe market. On a 2-ways connectivity basis the online bookings are integrated automatically into the PMS (guest information included). Furthermore, availabilities and rates are updated in real time for the online distribution.

It ensures the exact number of rooms per type are available at any time. Hotels will never miss again the opportunity to resell a cancelled room. Thanks to this automation solution the day to day hotel sales and administrative task are easier and not anymore time consuming rekeying. Mistakes are avoided while revenue is maximized.

Besides, Availpro provides a full suite from distribution to yield management, competitive intelligence, e-reputation and activity analytics that guides the hotelier in taking strategic decisions.

### About Availpro

Founded in 2001, Availpro is a leading provider of e-booking software solutions which allows hotels to increase their occupancy and revenue while saving costs. Availpro provides innovative and critical tools to help managers operate their on-line distribution, maximise commission-free bookings from their official website and facilitate decision-making processes regarding price optimisation and guest satisfaction.

Availpro partners with more than 300 companies around the world including largest OTA's, meta-search portals, Global Distribution Systems (GDS) and PMS & CRS providers.
